### BUSINESS PROCESS INTEGRATION

#### LEVERAGE COLLABORATION

Assist provides the ability for your company to move from managing individual functions to integrating all processes throughout the entire supply chain. Share information and leverage collaboration between buyers, suppliers, product development, distribution and sales.

#### ELIMINATE EFFICIENCIES

Get the flexibility you need to quickly and affordably adapt to market changes, capitalize on new opportunities, and improve order management. Strengthen your relationships with suppliers, customers, and contract manufacturers and eliminate inefficiencies throughout your organization by creating a complete business process flow from purchasing to payables.

#### MANAGE GLOBAL SUPPLY NETWORKS

In managing a supply chain in today's marketplace, companies are faced with complexities due to global suppliers and partners, stretched logistics networks and increased risk. Assist SCM can help you assure responsive planning and collaboration, integrate logistics and fulfillment processes, and manage the performance across global supply networks.

#### REDUCED LOGISTICS COSTS

Companies of nearly any size can benefit from Assist SCM. Meet your industry's specific inventory management and purchasing needs with easily integrated add-on solutions. Respond quickly to changes in supply demand, achieve customer satisfaction, reduce logistics costs, and improve logistics efficiency throughout your organization.

### SUPPLIER MANAGEMENT

#### MANAGE THE ENTIRE SUPPLIER CONTRACT LIFECYCLE

Assist Supplier Management system manages the entire supplier contract lifecycle, from authoring, collaboration, and negotiation to execution, status tracking, and compliance.

## ASSISTCornerstone

---

Effectively managing the entire supplier contract lifecycle is critical in reducing the cost of goods and services by enforcing contracted pricing with embedded terms and conditions.

### GENERATE BETTER SUPPLIER CONTACTS

Procurement departments can quickly author contracts that comply with corporate standards and enforce compliance to previously negotiated rates and pricing. Comprehensive contract policies establish control and reduce risk. Contract components can be implemented globally and reused throughout the organization. The result is best practices and standard terminology being used consistently throughout each business unit.

### FLEXIBLE WORKFLOW

Flexible workflow monitors suppliers' performance and expedites approval and contract signature. Streamline requisition processes and improve collaboration with vendors by giving them self-serve access to key data and information, including inventory reordering points and transaction histories.
