Reporting

Now that you are up and running with all these nice features and benefits, how do I find out how I am doing? How do I get the information I need into the hands of the people who need it? The *ASSISTCommerce Suite Reporting* module is actually three applications in one. Operational reports give you information regarding day to day tasks necessary to stay efficient. User reports give department people information they need to do their job. Management reports give executives the information they need to make high level decisions on what is best for the company to grow and prosper. Below just a sampling of reports available.

Operational Reports
